SUMMARY

Third-year Computer Science student targeting a Junior Penetration Tester role with hands-on experience in reconnaissance, service enumeration, vulnerability assessment, web application security testing, and exploitation in controlled lab environments. Practical experience with Nmap, Burp Suite, Metasploit, Hydra, WPScan, FFUF, Gobuster, and Linux-based security labs. Strengthened cybersecurity knowledge through NTI practical penetration testing training, DEPI Software Testing training, PortSwigger labs, and CTF platforms. Currently preparing for the eJPT v2 certification.

EDUCATION

Thebes Academy

Cairo, Egypt

*Bachelor of Computer Science, Third-Year Student, Relevant Coursework: Computer Networks, Expected Graduation: 2028
Operating Systems, Data Structures, Software Engineering, Cybersecurity Foundations*

EXPERIENCE

CTF & Offensive Security Practice

2026

CyberTalents & TryHackMe

- Solved practical security challenges covering FTP, SMB, SSH, web applications, and bind-shell environments using Nmap, Metasploit, Hydra, and Burp Suite.
- Performed reconnaissance and service enumeration to identify open ports, running services, and potential attack surfaces.
- Applied exploitation techniques in controlled CTF environments to validate identified vulnerabilities.

Web Application Security Testing

2026

PortSwigger Web Security Academy

- Tested vulnerable web applications using Burp Suite to intercept, modify, and analyze HTTP requests and responses.
- Identified and exploited common OWASP Top 10 vulnerabilities including XSS, SQL Injection, IDOR, LFI, Path Traversal, XXE, and SSRF.
- Documented vulnerability findings and exploitation steps to strengthen security assessment and technical reporting skills.

Network & Service Enumeration Labs

2026

Independent Practice

- Performed full-port Nmap scans to identify exposed services across FTP, SMB, SSH, HTTP, and MySQL environments.
- Enumerated discovered services to identify versions, configurations, and potential attack paths.
- Used enumeration results to guide vulnerability research and controlled exploitation.

Security Lab Infrastructure & Scripting

2026

Independent Technical Project

- Built isolated VirtualBox environments using Kali Linux and Windows systems for penetration testing and security research.
- Troubleshoot network connectivity, service configurations, and protocol communication across Linux and Windows environments.
- Developed Python and Bash scripts to automate reconnaissance and repetitive security-related tasks.

Penetration Testing & Cybersecurity Training

Jul–Aug 2026

60 Hours

- Studied vulnerability assessment, penetration testing methodologies, application security fundamentals, and risk identification.
- Covered WordPress security, cloud security auditing and compliance fundamentals, and log analysis and threat hunting.
- Completed 12 hours of cybersecurity-focused freelancing training covering professional positioning and client communication.
- Expected completion: August 2026

Software Development — Software Tester Track

Jul–Aug 2026

Digital Egypt Pioneers Initiative (DEPI)

- Completed practical training in software testing fundamentals, SDLC/STLC, test analysis and design, test case development, and defect reporting.
- Practiced API and web application testing using Postman and Selenium.
- Studied Java programming fundamentals and testing throughout the software development lifecycle.
- Developed professional skills in CV preparation, interview preparation, freelancing, proposal writing, and client communication.
- Completed: August 2026

TECHNICAL SKILLS

Penetration Testing: Vulnerability Assessment, Reconnaissance, Service Enumeration, Network Scanning, Exploitation Fundamentals, Privilege Escalation Fundamentals, Content Discovery

Web Security: OWASP Top 10, XSS, SQL Injection, IDOR, CSRF, LFI/RFI, Path Traversal, XXE, SSRF, WordPress Security

Security Tools: Nmap, Burp Suite, Metasploit, Hydra, Wireshark, WPScan, FFUF, Gobuster, Netcat, Postman, Selenium

Systems & Networking: Kali Linux, Ubuntu, Windows, Windows Server, TCP/IP, DNS, FTP, SSH, SMB, HTTP/HTTPS, VirtualBox

Programming & Scripting: Python, Bash, PowerShell, C++, PHP, JavaScript, Java

Web Development: HTML, CSS, JavaScript, PHP, Node.js, SQL, MySQL, SQLite

Software Testing: Manual Testing, Functional Testing, Regression Testing, Test Case Design, API Testing, Bug Reporting, SDLC, STLC

CERTIFICATIONS

eJPT v2 — Junior Penetration Tester — Certification Preparation | In Progress
